Dusan Simic

WordPress Master

 Serbia

Profile

Proficient WordPress Master, with notable specialization in PHP and JavaScript frameworks including WordPress, and React. I am an expert in every aspect of WordPress website creation, which includes page builders such as Elementor, Divi, Thrive, and theme & plugin customize, and WooCommerce. I excel in developing engaging and interactive websites. Leverage effective communication skills to translate strategic vision into actionable initiatives with relevant management teams.

Professional Experience

Senior Full Stack | WordPress Developer, *Upwork*
2023 Jun – present
- With proficiency in popular page builders like Elementor, Divi theme, Thrive theme, and Advanced Custom Fields, I developed over 10 WordPress websites that showcase visually appealing designs, advanced functionality, and seamless integration of custom features, including HTML5, CSS3, JavaScript, jQuery.
- Proficiently achieved over 10 fully responsive and user-friendly websites by leveraging SASS, gulp building, and Tailwind CSS using XD or Figma to customize themes, ensuring they can be tailored to specific design requirements if needed.
- Built over 10 WooCommerce websites customizing functions if needed by overriding WooCommerce plugin in the theme tasks according to the Shop pages, Product detail, Cart Pages
- Established over 15 WordPress websites using Elementor and Advanced Custom Fields (ACF) as the frontend, while customizing endpoints for required functions to implement the WordPress backend

Senior Full Stack Developer, *Diligent Software*
2023 Mar – 2023 Jun | Nis, Serbia
- Optimized WordPress websites between client-side and server-side code for the project, resulting in a significant 10% reduction in server response times, processing an Ajax request by customizing the endpoint.
- Implemented more than 10 custom WordPress plugins and backend solutions such as CF7, Gravity Form, and so on, ensuring high performance and availability, and managing all technical aspects of the CMS, leading to a 25% increase in company revenue
- Developed and maintained over 10 WordPress websites by utilizing the WP REST API to establish communication between client-side frameworks like React.js, incorporating JavaScript, and server-side technologies such as WordPress, involving PHP

Front-End(React, Vue.Js) Developer, PANONIT
2022 Oct – 2023 Mar | Novi Sad, Serbia
- Versed in React components like JSX, creating React components, Virtual DOM, React Props, Lifecycle methods, working with React States and Events
- Developed a Vue. js-based single-page application for a client, improving the user experience and increasing engagement.
- Developed responsive modules based on Business Requirements using HTML5, Tailwind CSS, Bootstrap
- Integrated RESTful APIs to fetch and display dynamic content, enhancing the functionality of the application.
- Responsible for the Style, look, and feel of the web page with SASS that extends CSS with behavior such as variable, mixing, operations, and functions
